

April 5, 2006

.Dear Sr or Madam, we are tired of both the hiring and attitude of Wall Mart. Now with the entrance of Banking, they are trying to dominate the dwindling middle class , using their funds to buy more cheap goods from China, Mexico and other lands where the jobs were outsourced. What more of a sign showing the decline of America, than a Cut Rate Store trying to take over another aspect of Society whose desire us to be separate and independent. Everyone states this is a Global Economy but with a weak Administration and Congress in session, it appears that our lives and jobs are being outsourced, and we are getting nothing in return. Very soon there will be no one able to save money in any bank, because the income has been far outclassed by the Cost of Living. "WHEN ARE WE GOING TO SAY ENOUGH"

John and Barbara Mortier
